EXPEDITION INSTRUCTIONS

While you are in the field, contact with NSRT experts will be intermittent at best. Contact with the native peoples and animals of the Amazon is to be expected and, we might add, feared. The following instructions should be utilized consistently. NSRT will have no liability in the event of psychological harm, bodily injury, or death.

INITIALIZING THE EXPEDITION: Technical Instructions

Phase I: Loading AMAZON

See insert for loading instructions.

Phase II: Identifying Your Expertise

You will be asked to identify your level of expertise. Please use one of these three classifications:

Novice: A capable, trained field agent. (One of our Novices spent three months in the Yukon searching for signs of an allegedly

extinct species of bear reported on the rampage. A small plane ferrying him into the region crash-landed and burned, leaving him with down garments, a magnifying glass, a Peregrine falcon, and a hunting knife. He survived, and the bear is now in captivity.)

Seasoned Explorer: An exceptionally qualified explorer. (A Seasoned Explorer parachuted into the southeasternmost portion of the Devil's Triangle, searching for a documented but unseen island at approximately 60°W, 25°N, near the Tropic of Cancer. After days in a rubber raft, he sighted the island, landed, and discovered a cache of moon rocks presumably lost by the Soviets.)

Expedition Leader: The pinnacle of expertise, with proven mental, diplomatic, and physical prowess. (Upon conquering Everest for the second time in 1973, our most infamous Expedition Leader descended into the country of Sikkim, made her way into the inner circles of the monarchy in Gangtok, and was retained to investigate alleged drug rings sponsored by foreign governments. She left in 1975 when the country was absorbed by India.)

Phase III: Starting and Conducting the Mission

The AMAZON mission is now ready to begin. Consult the instructions on Mission Protocol and Address (attached) for information on how to conduct the mission communications. You may also choose from any of three special commands, which maybe used at any time during the game.

A. Create

At any time in the mission, create a Save Disk for use in periodically storing data about your field position. In the event of a terminal accident, you may use the Save Disk to return to your previous position and resume the mission from there. (See instructions for the commands SAVE and RESTORE, below.)

To create your Save Disk:

1. Enter CREATE and follow the instructions on the screen.
Beware: The program will erase any contents of a disk that is being formatted as a Save Disk.
2. The disk drive light will go off when formatting is complete.
Remove your Save Disk and reinsert the game disk. You are ready to continue with the mission.

B. Save

For all but the most skilled of Expedition Leaders, the use of a Save Disk is advised. If at any point in the mission you feel your life is in danger, save your field position before proceeding. You will be able to return to that position -- and rectify your mistakes -- if

you are unable to escape death. (See "RESTORE," following.) Without a save disk, your only choice would be to start the mission over. The program will save up to ten positions. You may identify each position as you choose.

To save your field position at any point:

1. Enter SAVE and follow the instructions on the screen.
2. You will be instructed to select the number of the next available position and name the location (up to ten characters).
3. Follow the instructions on the screen to resume the mission.

C. Restore

At any time you may return to a field position to your Save Disk. This is useful in two instances.

1. In the event of a fatality
 - a. The computer will ask if you wish to play again. Follow the instructions on the screen.
 - b. Enter RESTORE and follow instructions, selecting a field position from your Save Disk.
 - c. The program will bring you to the position you chose, and you may continue from there.
2. If you wish to resume an unfinished mission
 - a. Load AMAZON as usual.
 - b. Enter RESTORE and follow the instructions on the screen, selecting the field position you wish from your Save Disk.
 - c. The program will bring you to the position you chose, and you may continue from there.

Phase IV: Emergency Procedures

A. Laser Defense Mechanism (LDM)

Our reports from the earlier Amazon expedition confirm that a warrior tribe, the Huni, feared throughout the region and known for unspeakable atrocities to their victims, zealously guards the Lost City of Chak and its surrounding terrain. Any intruders are attacked by night. The expedition team reported utilizing to the fullest their camp defense kits, in particular the laser defense mechanism (LASER). Thus I urgently advise that any foray you make into the Lost City be concluded by dusk, so you may execute complete peripheral defenses before nightfall.

B. Restarting the Mission

To return to the beginning at any point, enter RESTART.

MISSION PROTOCOL AND ADDRESS

I. General Communiques

When communicating with AMAZON, it is important to remember that AMAZON can use more words when informing you than you can use when instructing it. Consult the following word list to see what words AMAZON understands.

AMAZON responds to succinct, precise commands. A verb (FEED, SEARCH, TAKE) should always start the command; and a noun, whether a person, a place, or a thing (PACO, OFFICE, BOOK), should follow the verb.

FEED PACO
SEARCH OFFICE
TAKE BOOK

If you like, you may use THE before a noun: (TAKE THE BOOK).

You should separate multiple nouns from each other using a comma or AND, such as:

TAKE THE BOOK AND THE LETTER.
TAKE THE BOOK, THE LETTER, AND THE BOX.
TAKE BOOK, LETTER, AND BOX.
TAKE BOOK, LETTER, BOX.

It is not necessary to end a command with a period.

You may include several separate actions in one command, but you must separate each action by a comma or the word THEN. For example:

TAKE THE BOOK THEN READ THE BOOK.
TAKE THE BOOK, OPEN THE BOOK, THEN READ THE BOOK.
SEARCH THE DESK, THE BOX, AND THE BIRDCAGE, THEN CLOSE THE DOOR.

Commands should not be over two typed lines in length. If longer commands are necessary, separate commands into logical sequence and press RETURN between them.

II. Improper Commands

Commands that make no sense to AMAZON, that are impossible under the circumstances, that utilize objects not present at the time, or that use unknown words, will elicit one of several responses. Should you encounter such a response, try a different phrase.

III. Communicating with Others

Except when entering NSRT Headquarters or with the Kemani, you cannot speak unless you are spoken to first. Converse with others by entering your remark as you would any other command: HELLO (Unnecessary: "HELLO" or SAY HELLO.)

IV. Giving Directions and Exploring

Commands for moving in any particular direction may be given in several ways. Specify directions as full sentences (GO NORTH), as directions (SOUTH), or as abbreviations (S, N, W, E). UP and DOWN may be abbreviated U and D.

When you come to a place you'd like to explore, enter LOOK for a description of your surroundings. For further details about any particular item, enter INSPECT <name of item> or EXAMINE <item>.

V. Taking Inventory and Telling Time

It would be wise to check your belongings from time to time, especially when you feel you might have lost -- or might soon lose -- some of them. You also ought to inspect any new acquisition. Enter INVENTORY for a complete listing of your possessions, and, for a description of any chosen item, enter INSPECT <item> or EXAMINE <item>.

While exploring the Lost City of Chak, you may learn how quickly the day is passing by entering TIME.

STRATEGIC NOTES

We don't expect you to be mystified or unnerved by the complex, highly dangerous situations you will encounter while on this mission. However, NSRT recognizes that even the most expert field agent may encounter obstacles while resistance is low, or in a tight spot might forget the resources available. The following strategic notes have been designed as prompts, reminders, or, if you will, a "bag of tricks" for those rare moments when you feel most human.

One general hint: If you form an association with Paco the Parrot, ask his help by entering PACO. In many situations, Paco can assist enormously.

[already decoded]

At the airport: open letter
 At the jail: no way out
 At the Institute: show letter
 In the office: top shelf
 Getting down the cliff: computer
 Deep in the jungle: computer
 Outside troops' tent: wear goggles
 Later that same night: computer
 Kemani: smile
 Cave (Novice level): north
 (Expert level): wear goggles
 Weather turns cold: wear parka
 Boat repairs: parachute
 At the river (hippo): ask paco
 Alligator: oar
 At bridge: gun
 Fighting Hunis: laser
 At the statue: north wall
 At the antechamber doors: use graphic
 Soft volcanic earth: up

TOP SECRET

NSRT FIELD PARTY REGULATIONS

NSRT FIELD EQUIPMENT PACKS

All Field Parties are equipped with everything they will need for

field work. It is the responsibility of the Field Parties to thoroughly inventory and examine their equipment!

USE OF THE NSRT FIELD COMPUTER

All Field Parties are provided with a portable computer for use in communicating with NSRT Base.

After turning on the computer, an Input Code will be required to open transmission.

Each Field party will be informed of their Standard Input Code, and their Emergency Input Code. Standard Codes can be used at any time favorable for satellite transmission. Emergency Codes should be used only during emergencies.

Field Parties should make a note of their respective codes.

NSRT CODED FIELD MAP COORDINATES

All NSRT Field Maps are security coded for transmitting data coordinates to field operatives by satellite.

Rules for Coordinate Transmission via computer are as follows:

1. X Coordinate is always two letters (i.e., TB) and Y Coordinate is always a letter and a number (i.e., T5).
2. X Coordinate is always transmitted first (example: TB, T5).
3. Field operatives should always make a note of their location.
4. In situations where field operatives may be experiencing trouble determining their location, NSRT will transmit map coordinates at a rapid rate to assist the operatives. Remember: NSRT can locate your position anywhere on the surface of the earth within 2 meters.

Times, November 19, 1978

Amazon
Expedition
Ends In
Death

Scientists and Support
Crew Perish in Failed
Archaeological Trek

Cajun, Louisiana, UPI:

Eleven members of an archaeological expedition sponsored by the University of Tropicale in Cajun, Louisiana, have died in their attempt to reach the Lost City of Chak in the South American Amazon jungle. A twelfth member has survived with multiple critical injuries. The expedition was in its fourth month of a quest designed to take a full year to complete.

The US scientific team was headed by Dr. Nobel Savage, Professor of Anthropology at the University of Tropicale. His hand-picked team of five scientists and six support crew members was making its third attempt to reach the Lost City of Chak. The surviving team member, Dr. Basil Hykem, also with the University's Department of Anthropology, is in the care of the Rio de Janeiro General Hospital. Word on his condition has not been received, and an interview has not been permitted.

Last words from the expeditionary force were received in a radio transmission last Tuesday from Dr. Hykem to the Archaeological Center at the University. The transmission, however, was garbled and incomplete. Apparently, Dr. Hykem had witnessed the tragedy that beset the expedition, and is believed to have been assaulted during the transmission.

A radio transmission earlier in the week, from Savage to his wife, Dr. Felicity Jones-Savage, spoke of progress and elation on the part of the team.

"He said there was light at the end of the tunnel," reported Dr. Savage-Jones, "meaning they had apparently reached the first signs of the Lost City, and were about to entrench for the long haul."

The Lost City of Chak has yet to be reached and photographed by a modern expeditionary force. Legend holds that the ancient emerald mines near the city hold a rare form of emerald needed for the development of top secret materials for national defense. The Lost City has been the object of numerous attempts to brave the intense Amazon climate.

[insert:]

AMAZON (tm)

Loading on COMMODORE 64 (tm)

Note: This game uses one disk drive.

1. Arrange your computer with one disk drive and a monitor or television. Do not connect a printer.
2. Turn on the disk drive and the computer. Make certain that the SHIFT LOCK key is up.
3. Insert game Disk A into the disk drive and enter:
LOAD "DISK", 8
4. When the computer responds with READY, enter:
RUN

Additional Instructions

Updates from Headquarters

Enter NEWDATA to obtain information on the latest procedures.

Selecting Mission Controls

The mission may be conducted with or without pictures of the field and the mission. If no selection is made, the program will automatically provide pictures. Enter PICTURESOFF if only text is desired. This feature may be changed at any time by entering PICTURESON.

Selecting Command Controls

In the course of your AMAZON mission, you may elect to use a joystick (in addition to the keyboard) by entering JOYSTICK. The program will automatically assume keyboard use if no other command is entered. You may change means of play by entering KEYBOARD or JOYSTICK at any time.

Plug the joystick into Control Port 2.

Keyboard Commands for Action Sequences:

```

      up
    +---+
    | 1 |
    +---+
  +---+   +-----+
left | 2 |   |CTRL| right
  +---+   +-----+
      +---+
      |<--|
      +---+
      down

```

Press Space Bar to shoot.

RESTART

This command starts the mission over.
