S L O T - 8   Version 1.2 Copyright (c) 1991 Rick Lawsha

SLOT-8 is a simulation of an 8-way pay slot machine. An EGA or VGA
graphics adapter is required to play the game. There are only three
keys used to play the game:

              SPACE BAR - Increments the bet counter by one
                  ENTER - Pulls the handle on the slot machine
                    ESC - Quits the game

You are given a bankroll of $100 to start with. If you loose it all,
then the game is over and you will probably be insulted. A Top Ten all
time scoreboard is maintained. You will only see it if your score is
good
enough to get there. If the scores get too high for your liking then
delete the file called SLOT.SCR and the scoreboard will start over.

SLOT-8 is a SHAREWARE program. You are welcome to copy and distribute it
freely. If you use SLOT-8 for a period of 30 days or more then register
your copy by sending $10 or more to the following address:
